

RoSPA Accreditation Scheme

► Scheme objectives

This exceptionally popular and much sought-after accreditation scheme offers organisations the opportunity to demonstrate that their courses adhere to an accepted standard.

The scheme offers a professional assessment of driver training courses and lends added credibility.

Organisations' courses gain RoSPA's stamp of approval.

► Who the scheme is aimed at?

Those with responsibility for the delivery of training courses seeking accreditation.

► Additional information

The assessor will be looking for evidence that driver training and safety is important in the organisation's culture. You may wish to collate this information before the assessor arrives.

Accreditations will be valid for two years. After this time, clients can apply for a review to extend accreditation.

Benefits to client

Following the visit, your organisation will receive a detailed report highlighting the areas that have been assessed and setting out any further recommendations. Upon successful accreditation, your organisation will receive a RoSPA Accredited certificate to confirm its new accredited status.

Successful organisations can then use the RoSPA Accredited logo and the words 'Accredited by RoSPA Driver and Fleet Solutions', giving you increased credibility with your customers and the general public.

Duration

Duration is dependent upon the type and length of course to be accredited, and takes place at clients' premises.
