

4x4 On and Off-Road Course

► Course objectives

Delegates will leave with a lasting knowledge of the control and techniques needed to control a 4x4 vehicle.

Delegates will develop a systematic approach to the hazards found in on and off-road environments and increase awareness of wading depths, entry angle, break-over angle and exit angle.

► Who should attend?

Anyone who drives a 4x4 vehicle.

► Additional information

It would be an advantage if delegates were familiar with 4x4 vehicles.

This course is run on a 3:1 delegate to trainer ratio.

Customers must supply their own vehicles.

Benefits to client

- Delegates will have the necessary handling skills to go off-track and then come back on-road
- Fewer and lower accident repair costs
- Less down-time because of maintenance, repairs and injuries
- More reliable vehicle scheduling
- Savings on fuel, tyres and spares

Duration

This one-day course is held at dedicated sites around the UK.
