

E-Learning Course

► Description

The online course is divided into five modules, including levels of risk on the road, system of car control, defensive driving, factors affecting driving and vehicle technology.

E-learning uses a variety of methods to transfer information across to the user. Individuals can choose their preferred option from a variety of learning styles. This is coupled with interactive activities to complete and video clips from RoSPA's 'Driving for Work' film.

Knowledge checks are spread throughout the training to ensure users have a full understanding of areas covered.

► Aims and objectives

This online training programme is designed to help drivers develop the attitude and behaviours necessary to manage today's driving situations in the safest way.

► Who should attend?

Anyone who drives for work purposes.

► Additional information

On successful completion of the course, participants will receive a certificate of training.

Benefits to client

- Cost-effective – cheaper than having to do individual assessments of each employee
- Less down-time
- Allows employers to risk assess their workforce and prioritise individuals for further training

Duration

Completed in sessions to suit employers and individuals.
