

NEBOSH National Certificate in Construction Health and Safety

► Course objectives

This course aims to furnish delegates with a broad understanding of health and safety issues surrounding work in the construction industry.

Delegates will understand key construction issues in more technical detail and will understand general health and safety issues within the construction environment, as well as learning about specific construction issues that make the industry risky.

► Who should attend?

The qualification is suitable for those with construction management responsibilities, as well as for those who are required to provide routine, day-to-day advice on health, safety and welfare in construction work.
