

Asbestos Awareness

► Course objectives

The aim of this course is to develop delegates' awareness of asbestos. By the end of the training session delegates should be able to:

- Identify the different types of asbestos and their properties
- Identify the health risks associated with asbestos
- Identify where asbestos is commonly found
- Identify practical controls for asbestos safety
- Outline the requirements of the Control of Asbestos at Work Regulations

► Who should attend?

The course is intended for those working in building management, the construction industry, and those who work with facilities-type contracts or within facilities functions.

Delegates should be familiar with existing HSE guidance.
