

The Control of Substances Hazardous to Health (COSHH)

► Course objectives

This course is designed to introduce delegates to the importance of occupational health and the risks presented by chemical and biological health hazards.

On completion of the course delegates will understand:

- The ill-health effects of exposure to chemical and biological hazards
- The options to control these hazards in the workplace

► Who should attend?

The course is suitable for people with responsibility for the control of exposure to chemical and biological hazards in the workplace, including line managers, supervisors and safety representatives.

Course Content

- Forms of chemical and biological agents
- Classification of substances
- Routes of entry
- Health hazards of specific agents
- The role of COSHH
- Workplace exposure limits and other sources of information
- Control measures
- Surveys for health risks
- Environmental issues

Duration

1 day

Qualification

All those who successfully complete the course in full will be awarded a **RoSPA Certificate of Training**.
